PROFILE

CTO and Founder of TechHunterLab Company Limited, with 12+ years of software development experience, including 6+ years specializing in native Android. Deep expertise in Kotlin, Jetpack Compose, MVVM, Clean Architecture, and shipping production apps end to end — architecture, CI/CD, store releases, and post-release optimization. At TechHunterLab I lead product engineering across mobile, web, and AI, and still build hands-on in Flutter and fullstack when products need it.

EXPERIENCE

CTO & Founder

2026 – Present

TechHunterLab Company Limited · Myanmar · techhunterlab.com

- Founded TechHunterLab, a product engineering company that builds high-performance mobile, web, and AI solutions for ambitious businesses.
- Set technical direction and the delivery model — discover the problem, experiment with technology, engineer production systems, and scale as products grow.
- Lead architecture and hands-on engineering across Flutter, native Android (Kotlin), and fullstack web (Next.js), from first prototype to store and production release.
- Establish the engineering practice: quality bar, CI/CD, hiring, and maintainable systems that can evolve with client products.

Senior Flutter Developer

Jan 2024 – Present

JOY Detox & Healthy Meal Distribution Co.Ltd · Myanmar (Remote)

- Owned the full lifecycle of a production Flutter app (iOS & Android) with subscription meal plans, ecommerce-like ordering, and real-time support.
- Designed modular architecture with Riverpod for maintainability and faster feature delivery.
- Built real-time chat with Firebase for low-latency customer-coach communication.
- Implemented CI/CD with Fastlane + GitHub Actions for App Store & Play Store deployment.
- Diagnosed production crashes, performance bottlenecks, and API failures to keep the app stable.

Android Developer

Apr 2023 – Dec 2023

Zuju Gameplay PTE. Ltd · Singapore (Remote)

- Built scalable features for a live sports gameplay app focused on real-time interaction and performance.
- Applied MVVM and clean API integration for maintainable, testable modules.
- Shipped unit-tested modules that reduced regressions.
- Used Android & Rive animation libraries for smooth, interactive motion.

Android Developer

Jan 2022 – Apr 2023

Digital Services SG Six PTE. Ltd · Singapore (Remote)

- Delivered features for B2B apps Tinvio and Jaz Accounting — ordering and business workflows.
- Migrated legacy MVP architecture to MVVM for better scalability.
- Collaborated with design, backend, and product to ship reliably.
- Maintained automated tests to protect against regressions.

Senior Software Engineer (Android & Flutter)

Feb 2019 – Nov 2021

Twinrock PTE. Ltd · Singapore (Remote)

- Contributed to mobile and web system planning alongside the CTO.
- Built Flutter apps with Bloc and GetX for complex state flows.
- Led sprint planning across mobile and web teams.
- Managed App Store & Play Store releases and mentored developers through reviews.
